

Datasheet for ABIN7590955

Netrin 1 Protein (NTN1) (AA 25-604) (His tag)

Overview

Quantity:	100 μg
Target:	Netrin 1 (NTN1)
Protein Characteristics:	AA 25-604
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This Netrin 1 protein is labelled with His tag.
Application:	ELISA

Purification tag / Conjugate:	This Netrin 1 protein is labelled with His tag.
Application:	ELISA
Product Details

get Details	
get: N	Netrin 1 (NTN1)
rnative Name: N	Netrin-1 (Ntn1) (NTN1 Products)
kground: R	Recommended name: Netrin-1
Prot: Q	2924Z9
nways: R	Regulation of Cell Size
olication Details	
fo o' o' sy ac co n: th	The yeast protein expression system is the most economical and efficient eukaryotic system or secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
ndling	
nat: L _'	Lyophilized
centration: 0.	0.2-2 mg/mL
er: T	ris-based buffer, 50 % glycerol
	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
age: -2	20 °C
trictions: Formula in the bound of the contraction is a contraction in the contraction i	hat is very close to the natural protein. Our proteins produced by yeast expression speen used as raw materials for downstream preparation of monoclonal antibodies. For Research Use only Lyophilized 0.2-2 mg/mL Tris-based buffer, 50 % glycerol Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C to one week

Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
