

Datasheet for ABIN7591135 SENP2 Protein (AA 1-588) (His tag)

Go to Product page

_					
	W	0	rv	10	W

Quantity:	100 μg
Target:	SENP2
Protein Characteristics:	AA 1-588
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This SENP2 protein is labelled with His tag.
Application:	ELISA

Application:	ELISA

	cells or by baculovirus infection. Be aware about differences in price and lead time.	
Purity:	> 90 %	
Target Details		
Target:	SENP2	
Alternative Name:	Sentrin-specific protease 2 (Senp2) (SENP2 Products)	
Background:	Recommended name: Sentrin-specific protease 2.	
	EC= 3.4.22.68.	
	Alternative name(s): Axin-associating molecule.	
	Short name= Axam Sentrin/SUMO-specific protease SENP2	
UniProt:	Q9EQE1	
Pathways:	Chromatin Binding	
Application Details		
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system	
	for secretion and intracellular expression. A protein expressed by the mammalian cell system i	
	of very high-quality and close to the natural protein. But the low expression level, the high cost	
	of medium and the culture conditions restrict the promotion of mammalian cell expression	
	systems. The yeast protein expression system serve as a eukaryotic system integrate the	
	advantages of the mammalian cell expression system. A protein expressed by yeast system	
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the	
	native protein conformation. It can be used to produce protein material with high added value	
	that is very close to the natural protein. Our proteins produced by yeast expression system has	
	been used as raw materials for downstream preparation of monoclonal antibodies.	
Restrictions:	For Research Use only	
Handling		
Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to	

Handling

	one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
