

Datasheet for ABIN7591730 WBP2NL Protein (AA 1-313) (His tag)

Overview

Quantity:100 μgTarget:WBP2NLProtein Characteristics:AA 1-313Origin:CowSource:YeastProtein Type:RecombinantPurification tag / Conjugate:This WBP2NL protein is labelled with His tag.Application:ELISA	Overview	
Protein Characteristics: AA 1-313 Origin: Cow Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This WBP2NL protein is labelled with His tag.	Quantity:	100 μg
Origin: Cow Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This WBP2NL protein is labelled with His tag.	Target:	WBP2NL
Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This WBP2NL protein is labelled with His tag.	Protein Characteristics:	AA 1-313
Protein Type: Recombinant Purification tag / Conjugate: This WBP2NL protein is labelled with His tag.	Origin:	Cow
Purification tag / Conjugate: This WBP2NL protein is labelled with His tag.	Source:	Yeast
	Protein Type:	Recombinant
Application: ELISA	Purification tag / Conjugate:	This WBP2NL protein is labelled with His tag.
	Application:	ELISA

	AQQETSLPTT SSS
Specificity:	Bos taurus (Bovine)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	WBP2NL
Alternative Name:	Postacrosomal sheath WW domain-binding protein (WBP2NL) (WBP2NL Products)
Background:	Recommended name: Postacrosomal sheath WW domain-binding protein. Alternative name(s): WW domain-binding protein 2-like
UniProt:	A3KFF6

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20°C. For extended storage, conserve at -20°C or -80°C
