## anti-SCN1A antibody (AA 1929-2009) (FL650)

[Go to Product page](#)

### Overview

|                      |                                                       |
|----------------------|-------------------------------------------------------|
| Quantity:            | 200 µL                                                |
| Target:              | SCN1A                                                 |
| Binding Specificity: | AA 1929-2009                                          |
| Reactivity:          | Rat                                                   |
| Host:                | Mouse                                                 |
| Clonality:           | Monoclonal                                            |
| Conjugate:           | This SCN1A antibody is conjugated to FL650            |
| Application:         | Immunohistochemistry (IHC), Immunocytochemistry (ICC) |

### Product Details

|                   |                                                                                                                                                                                                                                                                                                            |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Purpose:          | Anti-Nav1.1 Na <sup>+</sup> Channel Antibody FL650 Conjugate                                                                                                                                                                                                                                               |
| Immunogen:        | Fusion protein amino acids 1929-2009 (cytoplasmic C-terminus) of rat Nav1.1 (accession number P04774) produced recombinantly in E. Coli                                                                                                                                                                    |
| Clone:            | K74-71                                                                                                                                                                                                                                                                                                     |
| Isotype:          | IgG1                                                                                                                                                                                                                                                                                                       |
| Specificity:      | No cross-reactivity with Nav1.2, Nav1.3 and Nav1.6                                                                                                                                                                                                                                                         |
| Cross-Reactivity: | Human, Mouse, Non-Human Primate, Rat                                                                                                                                                                                                                                                                       |
| Characteristics:  | Description: Our Anti-Nav1.1 Na <sup>+</sup> channel mouse monoclonal primary antibody is produced in-house from hybridoma clone K74/71. It detects human, mouse, non-human primate, and rat Nav1.1 Na <sup>+</sup> channel, and is purified by Protein A chromatography. It is great for use in IHC, ICC. |

## Product Details

|               |                                                                                                                                                                                                         |
|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | Manufacturer Comment: We produce our Nav1.1 Na <sup>+</sup> channel mouse monoclonal primary antibody from hybridoma clone K74/71. It is great in IHC, ICC and is purified by Protein A chromatography. |
| Purification: | Produced by in vitro bioreactor culture of hybridoma line followed by Protein A affinity chromatography and conjugation of purified mAb.                                                                |
| Purity:       | > 90 % specific antibody                                                                                                                                                                                |

## Target Details

|                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | SCN1A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Alternative Name: | Nav1.1 Na <sup>+</sup> channel ( <a href="#">SCN1A Products</a> )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Background:       | <p>Synonyms: Sodium channel protein type 1 subunit alpha (Sodium channel protein brain I subunit alpha) (Sodium channel protein type I subunit alpha) (Voltage-gated sodium channel subunit alpha Nav1.1)</p> <p>Target Description: Nav1.1 Na<sup>+</sup> channel (sodium channel, voltage-gated, type I, alpha subunit/ SCN1A) is a member of voltage-gated sodium ion channel subunit family. It is encoded by gene Scn1a in human. The channel switches between open and close conformation in response to the voltage difference accross the membrane. Nav1.1 Na<sup>+</sup> channel is a sodium selective channel that maintains Na<sup>+</sup> homeostasis by allowing Na<sup>+</sup> ions to pass in accordance of their electrochemical gradient. The protein plays an important role in the release of neurotransmitters from the neurons. Therefore, Nav1.1 Na<sup>+</sup> channel is involved in the perception of mechanical pain due to the activation of sematosensory neurons without the involvement of inflammation. Mutation of the gene encoding for Nav1.1 Na<sup>+</sup> channel is one of the main cause of epilepsy and febrile seizures.</p> <p>Gene Name Alternatives: Scn1a</p> |
| Molecular Weight: | 220 kDa                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

## Application Details

|                    |                                                                    |
|--------------------|--------------------------------------------------------------------|
| Application Notes: | Optimal working dilution should be determined by the investigator. |
| Restrictions:      | For Research Use only                                              |

## Handling

|         |        |
|---------|--------|
| Format: | Liquid |
|---------|--------|

## Handling

|                    |                                                                                                                                                                                                |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Concentration:     | 0.5 mg/mL                                                                                                                                                                                      |
| Buffer:            | PBS with 0.09 % azide                                                                                                                                                                          |
| Preservative:      | Sodium azide                                                                                                                                                                                   |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.                                                                         |
| Storage:           | 4 °C,-20 °C                                                                                                                                                                                    |
| Storage Comment:   | Aliquot and store at $\leq -20^{\circ}\text{C}$ for long term storage. For short term storage, store at 2-8°C. For maximum recovery of product, centrifuge the vial prior to removing the cap. |
| Expiry Date:       | 12 months                                                                                                                                                                                      |
