## CXCR5 Protein (DYKDDDDK Tag, Strep Tag)

[Go to Product page](#)

### Overview

|                               |                                                                                                                       |
|-------------------------------|-----------------------------------------------------------------------------------------------------------------------|
| Quantity:                     | 10 µg                                                                                                                 |
| Target:                       | CXCR5                                                                                                                 |
| Origin:                       | Human                                                                                                                 |
| Source:                       | HEK-293 Cells                                                                                                         |
| Protein Type:                 | Synthetic Nanodisc                                                                                                    |
| Purification tag / Conjugate: | This CXCR5 protein is labelled with DYKDDDDK Tag, Strep Tag.                                                          |
| Application:                  | Immunogen (Imm), ELISA, Surface Plasmon Resonance (SPR), Phage Display (PhD), Cryogenic electron microscopy (cryo-EM) |

### Product Details

|          |                                                          |
|----------|----------------------------------------------------------|
| Purpose: | Human CXCR5-Strep full length protein-synthetic nanodisc |
|----------|----------------------------------------------------------|

### Target Details

|                   |                                                                                                                                                                                                                                                                                                                             |
|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | CXCR5                                                                                                                                                                                                                                                                                                                       |
| Alternative Name: | CXCR5 ( <a href="#">CXCR5 Products</a> )                                                                                                                                                                                                                                                                                    |
| Background:       | BLR1, CD185, MDR15<br>A multi-pass membrane protein that belongs to the CXC chemokine receptor family. It is expressed in mature B-cells and Burkitt's lymphoma. This cytokine receptor binds to B-lymphocyte chemoattractant (BLC), and is involved in B-cell migration into B-cell follicles of spleen and Peyer patches. |
| Molecular Weight: | The human full length CXCR5-Strep protein has a MW of 42 kDa                                                                                                                                                                                                                                                                |

## Target Details

---

UniProt: [P32302](#)

## Application Details

---

|          |                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Comment: | Advantages: <ul style="list-style-type: none"><li>• Highly purified membrane proteins</li><li>• High solubility in aqueous solutions</li><li>• High stability</li><li>• Proteins are in a native membrane environment and remain biologically active</li><li>• No detergent and can be used for cell-based assays</li><li>• No MSP backbone proteins</li><li>• Mammalian cell expression system ensures post- translational modifications</li></ul> |

## Handling

---

|                  |                                                                                                                                                                                                                                                        |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Format:          | Lyophilized                                                                                                                                                                                                                                            |
| Buffer:          | Solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization.                                                                                                                 |
| Storage:         | -20 °C,-80 °C                                                                                                                                                                                                                                          |
| Storage Comment: | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).<br>Lyophilized proteins are shipped at ambient temperature. |
| Expiry Date:     | 12 months                                                                                                                                                                                                                                              |
