

### Datasheet for ABIN7597321

# E-cadherin Protein (AA 487-593) (Fc Tag)

#### Overview

Quantity:	10 μg
Target:	E-cadherin (CDH1)
Protein Characteristics:	AA 487-593
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This E-cadherin protein is labelled with Fc Tag.

#### **Product Details**

Purpose:	Recombinant human CDH1(487-593) Protein with C-terminal human Fc tag
Sequence:	CDH1(Val487-Pro593) hFc(Glu99-Ala330)
Purity:	The purity of the protein is greater than 90 % as determined by SDS-PAGE and Coomassie blue
	staining.

## **Target Details**

Target:	E-cadherin (CDH1)
Alternative Name:	CDH1 (CDH1 Products)
Background:	UVO, CDHE, ECAD, LCAM, Arc-1, BCDS1, CD324
	This gene encodes a classical cadherin of the cadherin superfamily. Alternative splicing results
	in multiple transcript variants, at least one of which encodes a preproprotein that is
	proteolytically processed to generate the mature glycoprotein. This calcium-dependent cell-cell

adhesion protein is comprised of five extracellular cadherin repeats, a transmembrane region
and a highly conserved cytoplasmic tail. Mutations in this gene are correlated with gastric,
breast, colorectal, thyroid and ovarian cancer. Loss of function of this gene is thought to
contribute to cancer progression by increasing proliferation, invasion, and/or metastasis. The
ectodomain of this protein mediates bacterial adhesion to mammalian cells and the
cytoplasmic domain is required for internalization. This gene is present in a gene cluster with
other members of the cadherin family on chromosome 16. [provided by RefSeq, Nov 2015]
predicted molecular mass of 38.0 kDa after removal of the signal peptide. The apparent
molecular mass of CDH1(487-593)-hFc is 35-55 kDa due to glycosylation.
P12830
WNT Signaling, Sensory Perception of Sound, Cell-Cell Junction Organization, Tube Formation
Extracellular Domain Proteins (ECD) can be used as:
Immunogens for antibody drug development
Reagents used for CAR-T positive cell monitoring
Reagents for antibody screening and functional testing
Reagents for antibody affinity measurement
The protein was made using HEK293 mammalian cell secretion expression system to ensure
the close-to-native structures and post-translational modifications of the target protein.
For Research Use only
Lyophilized
Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants
before lyophilization.
-20 °C,-80 °C
Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for
use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).
Lyophilized proteins are shipped at ambient temperature.
12 months
