

Datasheet for ABIN7599358

anti-KCNN4 antibody (AA 1-400)

()	ve	r\/i	۱۸/
\cup	V C	1 / 1	 v v

Quantity:	100 μg
Target:	KCNN4
Binding Specificity:	AA 1-400
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This KCNN4 antibody is un-conjugated
Application:	Western Blotting (WB), ELISA

Product Details

Purpose:	Anti-KCNN4 Antibody Picoband®
Immunogen:	E.coli-derived human KCNN4 recombinant protein (Position: M1-A400).
Isotype:	lgG
Cross-Reactivity (Details):	No cross-reactivity with other proteins.
Characteristics:	Anti-KCNN4 Antibody Picoband® (ABIN7599358). Tested in ELISA, WB applications. This antibody reacts with Human. The brand Picoband indicates this is a premium antibody that guarantees superior quality, high affinity, and strong signals with minimal background in Western blot applications. Only our best-performing antibodies are designated as Picoband, ensuring unmatched performance.
Purification:	Immunogen affinity purified.

Target Details

Target:	KCNN4	
Alternative Name:	KCNN4 (KCNN4 Products)	
Background:	Synonyms: Intermediate conductance calcium-activated potassium channel protein 4, SK4,	
	SKCa 4, SKCa4, IKCa1, IK1, KCa3.1, KCa4, Putative Gardos channel, KCNN4, IK1, IKCA1, KCA4,	
	SK4	
	Tissue Specificity: Widely expressed in non-excitable tissues.	
	Background: Intermediate conductance calcium-activated potassium channel protein 1	
	(KCNN4, Kca3.1) is part of a potentially heterotetrameric voltage-independent potassium	
	channel that is activated by intracellular calcium. Activation is followed by membrane	
	hyperpolarization, which promotes calcium influx. KCNN4 may be part of the predominant	
	calcium-activated potassium channel in T-lymphocytes. This gene is similar to other KCNN	
	family potassium channel genes, but it differs enough to possibly be considered as part of a	
	new subfamily.	
Molecular Weight:	45 kDa	
Gene ID:	3783	
UniProt:	015554	
Application Details		
Application Details Application Notes:	Western blot, 0.25-0.5 µg/mL. Human
