Target Details

Target:	KCNN4
Alternative Name:	Kcnn4 (KCNN4 Products)
Background:	Synonyms: Intermediate conductance calcium-activated potassium channel protein 4, SK4,
	SKCa 4, SKCa4, IKCa1, IK1, KCa3.1, KCa4, Putative Gardos channel, KCNN4, IK1, IKCA1, KCA4,
	SK4
	Tissue Specificity: Widely expressed in non-excitable tissues.
	Background: Intermediate conductance calcium-activated potassium channel protein 1
	(KCNN4, Kca3.1) is part of a potentially heterotetrameric voltage-independent potassium
	channel that is activated by intracellular calcium. Activation is followed by membrane
	hyperpolarization, which promotes calcium influx. KCNN4 may be part of the predominant
	calcium-activated potassium channel in T-lymphocytes. This gene is similar to other KCNN
	family potassium channel genes, but it differs enough to possibly be considered as part of a
	new subfamily.
Molecular Weight:	48 kDa
Gene ID:	16534
