

Datasheet for ABIN7603240

anti-TLR8 antibody (N-Term)

Overview

Purification:

Quantity:	100 μg
Target:	TLR8
Binding Specificity:	N-Term
Reactivity:	Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This TLR8 antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (IHC)
Product Details	
Purpose:	Anti-Tlr8 Antibody Picoband®
Immunogen:	A synthetic peptide corresponding to a sequence at the N-terminus of mouse Tlr8, which shares 76.5% amino acid (aa) sequence identity with human TLR8.
Isotype:	IgG
Cross-Reactivity (Details):	No cross-reactivity with other proteins.
Characteristics:	Anti-Tlr8 Antibody Picoband® (ABIN7603240). Tested in IHC, WB applications. This antibody reacts with Mouse, Rat. The brand Picoband indicates this is a premium antibody that guarantees superior quality, high affinity, and strong signals with minimal background in Western blot applications. Only our best-performing antibodies are designated as Picoband, ensuring unmatched performance.

Immunogen affinity purified.

Target Details

Target:	TLR8
Alternative Name:	Tlr8 (TLR8 Products)
Background:	Synonyms: Nuclear factor 1 B-type, NF1-B, Nuclear factor 1/B, CCAAT-box-binding transcriptio
	factor, CTF, Nuclear factor I/B, NF-I/B, NFI-B, TGGCA-binding protein, NFIB
	Background: TLR8 (Toll-like receptor 8) is a protein that in humans is encoded by the TLR8
	gene. TLR8 has also been designated as CD288 (cluster of differentiation 288). The TLR8 gene
	is mapped to Xp22.3-p22.2 by Chuang and Ulevitch (2000) and Du et al. (2000). The protein
	encoded by this gene is a member of the Toll-like receptor (TLR) family which plays a
	fundamental role in pathogen recognition and activation of innate immunity. TLRs are highly
	conserved from Drosophila to humans and share structural and functional similarities. They
	recognize pathogen-associated molecular patterns (PAMPs) that are expressed on infectious
	agents, and mediate the production of cytokines necessary for the development of effective
	immunity. The various TLRs exhibit different patterns of expression. This gene is predominant
	expressed in lung and peripheral blood leukocytes, and lies in close proximity to another family
	member, TLR7, on chromosome X. TLR8 recognises G-rich oligonucleotides.
Molecular Weight:	119 kDa
Gene ID:	170744
UniProt:	P58682
Pathways:	TLR Signaling, Activation of Innate immune Response, Toll-Like Receptors Cascades
Application Details	
Application Notes:	Western blot, 0.25-0.5 μg/mL, Mouse
	Immunohistochemistry(Paraffin-embedded Section), 2-5 µg/mL, Mouse, Rat

Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Reconstitution:	Adding 0.2 mL of distilled water will yield a concentration of 500 $\mu g/mL$.
Concentration:	500 μg/mL
Buffer:	Each vial contains 4 mg Trehalose, 0.9 mg NaCl, 0.2 mg Na2HPO4.
Storage:	4 °C,-20 °C
Storage Comment:	At -20°C for one year from date of receipt. After reconstitution, at 4°C for one month. It can also be aliquotted and stored frozen at -20°C for six months. Avoid repeated freezing and thawing.
