Target Details

Target:	RASSF6
Alternative Name:	RASSF6 (RASSF6 Products)
Background:	Synonyms: Putative RAS binding protein, Ras association domain containing protein

Target Details

6.RASF6_HUMAN

Background: This gene encodes a member of the Ras-association domain family (RASSF). Members of this family form the core of a highly conserved tumor suppressor network, the Salvador-Warts-Hippo (SWH) pathway. The protein encoded by this gene is a Ras effector protein that induces apoptosis. A genomic region containing this gene has been linked to susceptibility to viral bronchiolitis. Alternative splicing results in multiple transcript variants and protein isoforms. [provided by RefSeq, Jul 2012].
