**anti-DKK1 (Sirexatamab Biosimilar) antibody (Biotin)**[Go to Product page](#)

## Overview

|              |                                                                     |
|--------------|---------------------------------------------------------------------|
| Quantity:    | 50 µg                                                               |
| Target:      | DKK1 (Sirexatamab Biosimilar)                                       |
| Reactivity:  | Human                                                               |
| Host:        | Humanized                                                           |
| Clonality:   | Monoclonal                                                          |
| Conjugate:   | This DKK1 (Sirexatamab Biosimilar) antibody is conjugated to Biotin |
| Application: | Flow Cytometry (FACS)                                               |

## Product Details

|          |                                                    |
|----------|----------------------------------------------------|
| Purpose: | Biotinylated Anti-DKK1(sirexatamab biosimilar) mAb |
| Isotype: | IgG4                                               |

## Target Details

|                   |                                                                                   |
|-------------------|-----------------------------------------------------------------------------------|
| Target:           | DKK1 (Sirexatamab Biosimilar)                                                     |
| Alternative Name: | sirexatamab Biosimilar ( <a href="#">DKK1 (Sirexatamab Biosimilar) Products</a> ) |
| Target Type:      | Biosimilar                                                                        |
| Background:       | Synonyms Target:DKK-1,SK<br>Synonyms Antibody:DKN-01, LY-2812176                  |

## Application Details

|                    |                       |
|--------------------|-----------------------|
| Application Notes: | Flow Cyt 1:100        |
| Restrictions:      | For Research Use only |

## Handling

|                  |                                                                                                                                                                                                                                                        |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Format:          | Lyophilized                                                                                                                                                                                                                                            |
| Buffer:          | Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8 % trehalose is added as protectants before lyophilization.                                                                                                                                      |
| Storage:         | -20 °C,-80 °C                                                                                                                                                                                                                                          |
| Storage Comment: | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).<br>Lyophilized proteins are shipped at ambient temperature. |
