

Datasheet for ABIN7608009

anti-MPXV A29L antibody

Overview

Quantity:	10 μg
Target:	MPXV A29L
Reactivity:	Mpox Virus
Host:	Rabbit
Clonality:	Monoclonal
Conjugate:	Un-conjugated
Application:	ELISA

Product Details

Purpose:	Anti-Monkeypox virus A29L antibody(1A5), Rabbit mAb
Clone:	1A5
Isotype:	IgG
Purification:	Purified from cell culture supernatant by affinity chromatography

Target Details

- Target Details	
Target:	MPXV A29L
Background:	Monkeypox is a rare zoonosis caused by monkeypox virus, which has become the most serious
	orthpoxvirus and consists of complex double stranded DNA. The cases are mostly in central
	and western Africa. The pathogenesis of monkeypox is that the virus invades the body from
	respiratory mucosa, multiplies in lymphocytes, and incurs into blood producing transient
	venereal toxemia. after the virus multiplies in cells, the cells can invade the blood and propagate

Target Details

3	
	to the skin of the whole body, causing lesions. A29L binds to cell surface heparin to promote
	fusion of viral membrane with host plasma membrane.
UniProt:	Q77HM6
Application Details	
Application Notes:	Optimal working dilution should be determined by the investigator.
Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Buffer:	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8 % trehalose is added as protectants
	before lyophilization.
Storage:	-20 °C,-80 °C
Storage Comment:	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended fo
	use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).
	Lyophilized proteins are shipped at ambient temperature.
Expiry Date:	12 months
