## Target Details

Target:	CDH6
Alternative Name:	CDH6 ( <a href="#">CDH6 Products</a> )
Background:	This gene encodes a member of the cadherin superfamily. Cadherins are membrane glycoproteins that mediate homophilic cell-cell adhesion and play critical roles in cell differentiation and morphogenesis. The encoded protein is a type II cadherin and may play a role in kidney development as well as endometrium and placenta formation. Decreased
