### Overview

|              |                                                                                                           |
|--------------|-----------------------------------------------------------------------------------------------------------|
| Quantity:    | 100 µL                                                                                                    |
| Target:      | KIR2DL1                                                                                                   |
| Reactivity:  | Human                                                                                                     |
| Host:        | Mouse                                                                                                     |
| Clonality:   | Monoclonal                                                                                                |
| Conjugate:   | This KIR2DL1 antibody is un-conjugated                                                                    |
| Application: | Western Blotting (WB), Immunohistochemistry (IHC), Immunoprecipitation (IP),<br>Immunocytochemistry (ICC) |

### Product Details

|                  |                                                                                                                                                                       |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Purpose:         | Killer Cell Immunoglobulin Like Receptor 2DL1 (KIR2DL1) Monoclonal Antibody                                                                                           |
| Immunogen:       | Recombinant KIR2DL1 expressed in E. coli                                                                                                                              |
| Clone:           | D11                                                                                                                                                                   |
| Isotype:         | IgG1 kappa                                                                                                                                                            |
| Characteristics: | The Killer Cell Immunoglobulin Like Receptor 2DL1 (KIR2DL1) Monoclonal Antibody (Species: Human) has been validated for the following applications: WB, IHC, ICC, IP. |
| Purification:    | Protein A + Protein G affinity chromatography                                                                                                                         |

### Target Details

|         |         |
|---------|---------|
| Target: | KIR2DL1 |
|---------|---------|

## Target Details

Alternative Name: KIR2DL1 ([KIR2DL1 Products](#))

Gene ID: 3802

UniProt: [P43626](#)

## Application Details

Application Notes: Optimal working dilution should be determined by the investigator.

Restrictions: For Research Use only

## Handling

Format: Liquid

Concentration: 1 mg/mL

Buffer: 0.01M PBS, pH 7.4, containing 0.05 % Proclin-300, 50 % glycerol

Preservative: ProClin

Precaution of Use: This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Storage: 4 °C, -20 °C

Storage Comment: 2°C to 8°C for frequent use, -20°C for 12 months. Avoid repeated freeze/thaw cycles.

Expiry Date: 12 months
