## Overview

|              |                                                                                                       |
|--------------|-------------------------------------------------------------------------------------------------------|
| Quantity:    | 1 mL                                                                                                  |
| Target:      | LGALS8                                                                                                |
| Reactivity:  | Human                                                                                                 |
| Host:        | Rabbit                                                                                                |
| Clonality:   | Polyclonal                                                                                            |
| Conjugate:   | This LGALS8 antibody is conjugated to FITC                                                            |
| Application: | Western Blotting (WB), Immunohistochemistry (IHC), Immunocytochemistry (ICC), Immunofluorescence (IF) |

## Product Details

|               |                                                                                                                                                                                |
|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Purpose:      | FITC-Linked Polyclonal Antibody to Galectin 8 (GAL8)                                                                                                                           |
| Isotype:      | IgG                                                                                                                                                                            |
| Specificity:  | The antibody is a rabbit polyclonal antibody raised against GAL8. It has been selected for its ability to recognize GAL8 in immunohistochemical staining and western blotting. |
| Purification: | Antigen-specific affinity chromatography followed by Protein A affinity chromatography                                                                                         |

## Target Details

|                   |                                                                                                                                                                           |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | LGALS8                                                                                                                                                                    |
| Alternative Name: | Galectin 8 ( <a href="#">LGALS8 Products</a> )                                                                                                                            |
| Background:       | LGALS8, PCTA1, Po66-CBP, Prostate Carcinoma Tumor Antigen 1, Lectin, Galactoside-Binding Soluble 8, Po66 carbohydrate-binding protein, Prostate carcinoma tumor antigen 1 |

## Target Details

---

UniProt: [O00214](#)

## Application Details

---

Application Notes: Western blotting: 0.2-2 µg/mL, 1:250-2500 Immunohistochemistry: 5-20 µg/mL, 1:25-100  
Immunocytochemistry: 5-20 µg/mL, 1:25-100 Optimal working dilutions must be determined by end user.

Comment: The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.

Restrictions: For Research Use only

## Handling

---

Format: Liquid

Concentration: 500 µg/mL

Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol.

Preservative: Sodium azide

Precaution of Use: This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Storage: 4 °C, -20 °C

Storage Comment: Store at 4°C for frequent use. Stored at -20°C in a manual defrost freezer for two year without detectable loss of activity. Avoid repeated freeze-thaw cycles.
