

Datasheet for ABIN7635690 **anti-Cpped1 antibody**

[Go to Product page](#)

Overview

Quantity:	100 µL
Target:	Cpped1
Reactivity:	Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This Cpped1 antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (IHC)

Product Details

Purpose:	Polyclonal Antibody to Calcineurin Like Phosphoesterase Domain Containing Protein 1 (CPPED1)
Immunogen:	RPE031Mu01Recombinant Calcineurin Like Phosphoesterase Domain Containing Protein 1 (CPPED1)
Isotype:	IgG
Specificity:	The antibody is a rabbit polyclonal antibody raised against CPPED1. It has been selected for its ability to recognize CPPED1 in immunohistochemical staining and western blotting.
Cross-Reactivity:	Human, Rat
Purification:	Antigen-specific affinity chromatography followed by Protein A affinity chromatography

Target Details

Target:	Cpped1
---------	--------

Target Details

Alternative Name:	CPPED1 (Cpped1 Products)
Background:	CSTP1, Complete S Transactivated Protein 1, Calcineurin-like phosphoesterase domain-containing protein 1
UniProt:	Q8BFS6

Application Details

Application Notes:	Western blotting: 0.01-2 µg/mL, Immunohistochemistry: 5-20 µg/mL, Optimal working dilutions must be determined by end user.
Comment:	The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.
Restrictions:	For Research Use only

Handling

Format:	Liquid
Concentration:	0.5 mg/mL
Buffer:	0.01M PBS, pH 7.4, containing 0.05 % Proclin-300, 50 % glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	4 °C, -20 °C
Storage Comment:	Store at 4°C for frequent use. Stored at -20°C in a manual defrost freezer for two year without detectable loss of activity. Avoid repeated freeze-thaw cycles.
