

Datasheet for ABIN7635720 anti-CACNA1B antibody

Overview

Quantity:	100 μL
Target:	CACNA1B
Reactivity:	Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This CACNA1B antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (IHC), Immunoprecipitation (IP), Immunocytochemistry (ICC)

Product Details

Purpose:	Polyclonal Antibody to Calcium Channel, Voltage Dependent, N-Type, Alpha 1B Subunit (CACNa1B)
Isotype:	lgG
Specificity:	The antibody is a rabbit polyclonal antibody raised against CACNa1B. It has been selected for its ability to recognize CACNa1B in immunohistochemical staining and western blotting.
Purification:	Antigen-specific affinity chromatography followed by Protein A affinity chromatography

Target Details

Target:	CACNA1B
Alternative Name:	CACNa1B (CACNA1B Products)
Background:	CACNN, CACNL1A5, BIII, Brain calcium channel III, Calcium channel, L type, alpha-1 polypeptide

Target Details

Immunocytochemistry: 5-20 μg/mL,1:25-100 Optimal working dilutions must be determined user. Comment: The thermal stability is described by the loss rate. The loss rate was determined by access thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expectate under appropriate storage condition. Restrictions: For Research Use only Handling Format: Liquid Concentration: 500 μg/mL Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: Sodium azide Precaution of Use: This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which is should be handled by trained staff only. Storage: 4 °C, 20 °C		
Application Details Application Notes: Western blotting: 0.2-2 μg/mL,1:250-2500 Immunohistochemistry: 5-20 μg/mL,1:25-100 Immunocytochemistry: 5-20 μg/mL,1:25-100 Optimal working dilutions must be determinend user. Comment: The thermal stability is described by the loss rate. The loss rate was determined by access thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expectation of the comment of the comm		isoform 5, Voltage-gated calcium channel subunit alpha Cav2.2
Application Notes: Western blotting: 0.2-2 μg/mL,1:250-2500 Immunohistochemistry: 5-20 μg/mL,1:25-100 Immunocytochemistry: 5-20 μg/mL,1:25-100 Optimal working dilutions must be determinend user. Comment: The thermal stability is described by the loss rate. The loss rate was determined by access thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expectate under appropriate storage condition. Restrictions: For Research Use only Handling Format: Liquid Concentration: 500 μg/mL Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: Sodium azide Precaution of Use: This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which is should be handled by trained staff only. Storage: 4 °C,-20 °C Storage Comment: Store at 4°C for frequent use. Stored at -20°C in a manual defrost freezer for two year with the storage comment is stored.	UniProt:	055017
Immunocytochemistry: 5-20 μg/mL,1:25-100 Optimal working dilutions must be determined user. Comment: The thermal stability is described by the loss rate. The loss rate was determined by access thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expectation was appropriate storage condition. Restrictions: For Research Use only Handling Format: Liquid Concentration: 500 μg/mL Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: Sodium azide Precaution of Use: This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. Storage: 4 °C, 20 °C Storage Comment: Store at 4°C for frequent use. Stored at -20°C in a manual defrost freezer for two year with the protein at 37°C for frequent use.	Application Details	
thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the extension date under appropriate storage condition. Restrictions: For Research Use only Handling Format: Liquid Concentration: 500 µg/mL Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: Sodium azide Precaution of Use: This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. Storage: 4 °C,-20 °C Storage Comment: Store at 4°C for frequent use. Stored at -20°C in a manual defrost freezer for two year with the protein at 37°C for frequent use.
