

## Datasheet for ABIN7636194

## anti-CEBPA antibody

_		erview				
	1//	r	1//	$\triangle$	۸/	
	V		VI		/ V	

Quantity:	100 μL	
Target:	CEBPA	
Reactivity:	Rat	
Host:	Mouse	
Clonality:	Monoclonal	
Conjugate:	This CEBPA antibody is un-conjugated	
Application:	Western Blotting (WB), Immunohistochemistry (IHC), Immunocytochemistry (ICC), Immunoprecipitation (IP)	

## **Product Details**

Target:

Purpose:	Monoclonal Antibody to CCAAT/Enhancer Binding Protein Alpha (CEBPa)	
Immunogen:	RPA644Ra01Recombinant CCAAT/Enhancer Binding Protein Alpha (CEBPa)	
Clone:	C5	
Specificity:	The antibody is a mouse monoclonal antibody raised against CEBPa. It has been selected for its ability to recognize CEBPa in immunohistochemical staining and western blotting.	
Cross-Reactivity:	Human	
Purification:	Protein A + Protein G affinity chromatography	
Target Details		

**CEBPA** 

Target Details		
Alternative Name:	CEBPa (CEBPA Products)	
Background:	CEBP-A	
UniProt:	P05554	
Pathways:	Brown Fat Cell Differentiation, Positive Regulation of fat Cell Differentiation	
Application Details		
Application Notes:	Western blotting: 0.2-2 μg/mL,Immunohistochemistry: 5-20 μg/mL,Immunocytochemistry: 5-20 μg/mL,Optimal working dilutions must be determined by end user.	
Comment:	The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.	
Restrictions:	For Research Use only	
Handling		
Format:	Liquid	
Concentration:	1 mg/mL	
Buffer:	0.01M PBS, pH 7.4, containing 0.05 % Proclin-300, 50 % glycerol.	
Preservative:	ProClin	

This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE which should be
