anti-CXCL11 antibody

\sim				
	1//	Д	rv	۱۸/

Quantity:	100 μL	
Target:	CXCL11	
Reactivity:	Human	
Host:	Mouse	
Clonality:	Monoclonal	
Conjugate:	This CXCL11 antibody is un-conjugated	
Application:	Western Blotting (WB), Immunohistochemistry (IHC), Immunoprecipitation (IP), Immunocytochemistry (ICC)	

Product Details

Purpose:	Monoclonal Antibody to Interferon Inducible T-Cell Alpha Chemoattractant (ITaC)
Specificity:	The antibody is a mouse monoclonal antibody raised against ITaC. It has been selected for its
	ability to recognize ITaC in immunohistochemical staining and western blotting.
Purification:	Antigen-specific affinity chromatography followed by Protein A affinity chromatography

Target Details

Target:	CXCL11
Alternative Name:	ITaC (CXCL11 Products)
Background:	CXCL11, I-TAC, IP9, SCYB11, SCYB9B, B-R1, Chemokine(C-X-C-Motif)ligand 11, Small Inducible Cytokine Subfamily B Member 11, Interferon gamma-inducible protein 9
UniProt:	014625

Application Details

Application Notes:	Western blotting: 0.2-2 μ g/mL,1:500-5000 Immunohistochemistry: 5-20 μ g/mL,1:50-200 Immunocytochemistry: 5-20 μ g/mL,1:50-200 Optimal working dilutions must be determined by end user.	
Comment:	The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.	
Restrictions:	For Research Use only	
Handling		
Format:	Liquid	
Concentration:	1 mg/mL	
Buffer:	PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol.	
Preservative:	Sodium azide	
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.	
Storage:	4 °C,-20 °C	
Storage Comment:	Store at 4°C for frequent use. Stored at -20°C in a manual defrost freezer for two year without detectable loss of activity. Avoid repeated freeze-thaw cycles.
