

Datasheet for ABIN7638147 **anti-DNAH11 antibody**

[Go to Product page](#)

Overview

Quantity:	100 µL
Target:	DNAH11
Reactivity:	Human
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This DNAH11 antibody is un-conjugated
Application:	Immunohistochemistry (IHC), Western Blotting (WB), Immunoprecipitation (IP), Immunocytochemistry (ICC)

Product Details

Purpose:	Monoclonal Antibody to Dynein, Axonemal, Heavy Chain 11 (DNAH11)
Immunogen:	RPJ201Hu02Recombinant Dynein, Axonemal, Heavy Chain 11 (DNAH11)
Clone:	C6
Specificity:	The antibody is a mouse monoclonal antibody raised against DNAH11. It has been selected for its ability to recognize DNAH11 in immunohistochemical staining and western blotting.
Purification:	Protein A + Protein G affinity chromatography

Target Details

Target:	DNAH11
Alternative Name:	DNAH11 (DNAH11 Products)

Target Details

Background: DNAHBL, DNAHC11, DNHBL, DPL11, Dynein, Heavy Chain Beta-Like, Axonemal beta dynein heavy chain 11, Ciliary dynein heavy chain 11

UniProt: [Q96DT5](#)

Application Details

Application Notes: Western blotting: 0.01-2 µg/mL, Immunohistochemistry: 5-20 µg/mL, Immunocytochemistry: 5-20 µg/mL, Optimal working dilutions must be determined by end user.

Comment: The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.

Restrictions: For Research Use only

Handling

Format: Liquid

Concentration: 1 mg/mL

Buffer: 0.01M PBS, pH 7.4, containing 0.05 % Proclin-300, 50 % glycerol.

Preservative: ProClin

Precaution of Use: This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Storage: 4 °C, -20 °C

Storage Comment: Store at 4°C for frequent use. Stored at -20°C in a manual defrost freezer for two year without detectable loss of activity. Avoid repeated freeze-thaw cycles.
