

## Datasheet for ABIN7639392

### anti-GAN antibody

[Go to Product page](#)

#### Overview

Quantity:	100 µL
Target:	GAN
Reactivity:	Human
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This GAN antibody is un-conjugated
Application:	Western Blotting (WB), Immunoprecipitation (IP), Immunohistochemistry (IHC), Immunocytochemistry (ICC)

#### Product Details

Purpose:	Monoclonal Antibody to Gigaxonin (GAN)
Specificity:	The antibody is a mouse monoclonal antibody raised against GAN. It has been selected for its ability to recognize GAN in immunohistochemical staining and western blotting.
Purification:	Antigen-specific affinity chromatography followed by Protein A affinity chromatography

#### Target Details

Target:	GAN
Alternative Name:	Gigaxonin ( <a href="#">GAN Products</a> )
Background:	GAN1, KLHL16, Giant Axonal Neuropathy, Kelch-like protein 16
UniProt:	<a href="#">Q9H2C0</a>

## Application Details

Application Notes:	Western blotting: 0.2-2 µg/mL, 1:500-5000 Immunohistochemistry: 5-20 µg/mL, 1:50-200 Immunocytochemistry: 5-20 µg/mL, 1:50-200 Optimal working dilutions must be determined by end user.
--------------------	---

Comment:	The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.
----------	---

Restrictions:	For Research Use only
---------------	-----------------------

## Handling

Format:	Liquid
---------	--------

Concentration:	1 mg/mL
----------------	---------

Buffer:	PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol.
---------	---

Preservative:	Sodium azide
---------------	--------------

Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
--------------------	--

Storage:	4 °C, -20 °C
----------	--------------

Storage Comment:	Store at 4°C for frequent use. Stored at -20°C in a manual defrost freezer for two year without detectable loss of activity. Avoid repeated freeze-thaw cycles.
------------------	---
