

Datasheet for ABIN7642819 **anti-MSMB antibody**

[Go to Product page](#)

Overview

Quantity:	100 µL
Target:	MSMB
Reactivity:	Human
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This MSMB antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (IHC), Immunoprecipitation (IP), Immunocytochemistry (ICC)

Product Details

Purpose:	Monoclonal Antibody to Microseminoprotein Beta (MSMb)
Immunogen:	RPC628Hu01 Recombinant Microseminoprotein Beta (MSMb)
Specificity:	The antibody is a mouse monoclonal antibody raised against MSMB. It has been selected for its ability to recognize MSMB in immunohistochemical staining and western blotting.
Purification:	Protein A + Protein G affinity chromatography

Target Details

Target:	MSMB
Alternative Name:	MSMb (MSMB Products)
Background:	MSM-B, IGBF, MSP, MSPB, PN44, PRPS, PSP, PSP57, PSP94, Immunoglobulin-binding factor, Prostate secreted seminal plasma protein, plasma beta-inhibin

Target Details

UniProt: [P08118](#)

Application Details

Application Notes: Western blotting: 0.2-2 µg/mL, 1:500-5000 Immunohistochemistry: 5-20 µg/mL, 1:50-200
Immunocytochemistry: 5-20 µg/mL, 1:50-200 Optimal working dilutions must be determined by end user.

Comment: The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.

Restrictions: For Research Use only

Handling

Format: Liquid

Concentration: 1 mg/mL

Buffer: 0.01M PBS, pH 7.4, containing 0.05 % Proclin-300, 50 % glycerol.

Preservative: ProClin, Sodium azide

Precaution of Use: This product contains ProClin and Sodium azide: POISONOUS AND HAZARDOUS SUBSTANCES which should be handled by trained staff only.

Storage: 4 °C, -20 °C

Storage Comment: Store at 4°C for frequent use. Stored at -20°C in a manual defrost freezer for two year without detectable loss of activity. Avoid repeated freeze-thaw cycles.
