

### Datasheet for ABIN7643304

# anti-Nephronectin antibody

#### Overview

Quantity:	100 μL
Target:	Nephronectin (NPNT)
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This Nephronectin antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (IHC), Immunoprecipitation (IP), Immunocytochemistry (ICC)

### **Product Details**

Target:

Alternative Name:

Purpose:	Polyclonal Antibody to Nephronectin (NPNT)
Immunogen:	RPH522Hu03Recombinant Nephronectin (NPNT)
Isotype:	IgG
Specificity:	The antibody is a rabbit polyclonal antibody raised against NPNT. It has been selected for its ability to recognize NPNT in immunohistochemical staining and western blotting.
Purification:	Antigen-specific affinity chromatography followed by Protein A affinity chromatography
Target Details	

Nephronectin (NPNT)

NPNT (NPNT Products)

## **Target Details**

Background:	EGFL6L, POEM, Preosteoblast EGF-like repeat protein with MAM domain, Protein EGFL6-like
UniProt:	Q6UXI9
Application Details	
Application Notes:	Western blotting: 0.2-2 μg/mL,Immunohistochemistry: 5-20 μg/mL,Immunocytochemistry: 5-
	20 μg/mL,Optimal working dilutions must be determined by end user.
Comment:	The thermal stability is described by the loss rate. The loss rate was determined by accelerated
	thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious
	degradation and precipitation were observed. The loss rate is less than 5% within the expiration
	date under appropriate storage condition.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	0.5 mg/mL
Buffer:	0.01M PBS, pH 7.4, containing 0.05 % Proclin-300, 50 % glycerol.
Preservative:	ProClin, Sodium azide
Precaution of Use:	This product contains ProClin and Sodium azide: POISONOUS AND HAZARDOUS SUBSTANCES
	which should be handled by trained staff only.
Storage:	4 °C,-20 °C
Storage Comment:	Store at 4°C for frequent use. Stored at -20°C in a manual defrost freezer for two year without
	detectable loss of activity. Avoid repeated freeze-thaw cycles.
