Target Details

Background: PRGP4, TMG4, Proline Rich Gla 4, Proline-rich gamma-carboxyglutamic acid protein 4, Transmembrane gamma-carboxyglutamic acid protein 4

UniProt: [D3ZZA9](#)

Application Details

Application Notes: Western blotting: 0.01-2 µg/mL, Immunohistochemistry: 5-20 µg/mL, Immunocytochemistry: 5-20 µg/mL, Optimal working dilutions must be determined by end user.

Comment: The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.
