Target Details

Background: CD315, CD9P-1, EWI-F, FPRP, SMAP-6, CD9 partner 1, Glu-Trp-Ile EWI motif-containing protein F, Prostaglandin F2-alpha receptor-associated protein

UniProt: [Q9P2B2](#)

Application Details

Application Notes: Western blotting: 0.5-2 µg/mL, Immunohistochemistry: 5-20 µg/mL, Immunocytochemistry: 5-20 µg/mL, Optimal working dilutions must be determined by end user.

Comment: The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.

Restrictions: For Research Use only
