## **Application Details**

Application Notes:

	20 μg/mL,Optimal working dilutions must be determined by end user.
Comment:	The thermal stability is described by the loss rate. The loss rate was determined by accelerated
	thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration
	date under appropriate storage condition.
Restrictions:	For Research Use only

Western blotting:  $0.5-2 \mu g/mL$ , Immunohistochemistry:  $5-20 \mu g/mL$ , Immunocytochemistry:  $5-20 \mu g/mL$
