anti-Thymic Stromal Lymphopoietin antibody

[Go to Product page](#)

Overview

Quantity:	100 µL
Target:	Thymic Stromal Lymphopoietin (TSLP)
Reactivity:	Human
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This Thymic Stromal Lymphopoietin antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (IHC), Immunoprecipitation (IP), Immunocytochemistry (ICC)

Product Details

Purpose:	Monoclonal Antibody to Thymic Stromal Lymphopoietin (TSLP)
Immunogen:	RPB320Hu01Recombinant Thymic Stromal Lymphopoietin (TSLP)
Clone:	D11
Specificity:	The antibody is a mouse monoclonal antibody raised against TSLP. It has been selected for its ability to recognize TSLP in immunohistochemical staining and western blotting.
Cross-Reactivity:	Pig
Purification:	Protein A + Protein G affinity chromatography

Target Details

Target:	Thymic Stromal Lymphopoietin (TSLP)
---------	-------------------------------------

Target Details

Alternative Name: TSLP ([TSLP Products](#))

UniProt: [Q969D9](#)

Application Details

Application Notes: Western blotting: 0.01-2 µg/mL, Immunohistochemistry: 5-30 µg/mL, Immunocytochemistry: 5-30 µg/mL, Optimal working dilutions must be determined by end user.

Comment: The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.

Restrictions: For Research Use only

Handling

Format: Liquid

Concentration: 1 mg/mL

Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol.

Preservative: Sodium azide

Precaution of Use: This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Storage: 4 °C, -20 °C

Storage Comment: Store at 4°C for frequent use. Stored at -20°C in a manual defrost freezer for two year without detectable loss of activity. Avoid repeated freeze-thaw cycles.
