

Datasheet for ABIN7647976  
**anti-VAPA antibody**

[Go to Product page](#)

## Overview

Quantity:	100 µL
Target:	VAPA
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This VAPA antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (IHC), Immunofluorescence (IF), Immunocytochemistry (ICC)

## Product Details

Purpose:	Polyclonal Antibody to Vesicle Associated Membrane Protein Associated Protein A (VAPA)
Immunogen:	RPF566Hu01 Recombinant Vesicle Associated Membrane Protein Associated Protein A (VAPA)
Isotype:	IgG
Specificity:	The antibody is a rabbit polyclonal antibody raised against VAPA. It has been selected for its ability to recognize VAPA in immunohistochemical staining and western blotting.
Cross-Reactivity:	Mouse, Pig, Rat
Purification:	Antigen-specific affinity chromatography followed by Protein A affinity chromatography

## Target Details

Target:	VAPA
---------	------

## Target Details

Alternative Name:	VAPA ( <a href="#">VAPA Products</a> )
Background:	VAP-A, VAP33, hVAP-33, 33 kDa VAMP-associated protein
UniProt:	<a href="#">Q9P0L0</a>

## Application Details

Application Notes:	Western blotting: 0.01-2 µg/mL, Immunohistochemistry: 5-20 µg/mL, Immunocytochemistry: 5-20 µg/mL, Optimal working dilutions must be determined by end user.
Comment:	The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.
Restrictions:	For Research Use only

## Handling

Format:	Liquid
Concentration:	0.5 mg/mL
Buffer:	PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol.
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	4 °C, -20 °C
Storage Comment:	Store at 4°C for frequent use. Stored at -20°C in a manual defrost freezer for two year without detectable loss of activity. Avoid repeated freeze-thaw cycles.
