Product Details

Purpose:	Glutathione S-Transferase Mu1 (GSTM1)(CPTC-GSTMu1-3)
Immunogen:	Recombinant human full-length GSTMu1 protein
Clone:	CPTC-GSTMu1-3
Isotype:	IgG1, kappa
Characteristics:	Recognizes Glutathione S-Transferase of the mu class, which is involved in the detoxification of toxins, drugs, and products of oxidative stress by conjugation with glutathione. Primary antibodies are available purified, or with a selection of fluorescent CF® Dyes and other labels. CF® Dyes offer exceptional brightness and photostability. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.
