Quantity:	100 tests
Target:	CD163
Reactivity:	Human
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This CD163 antibody is conjugated to PE
Application:	Flow Cytometry (FACS)

Product Details

Immunogen:	Hairy cell leukemia cells
Clone:	GHI-61
Isotype:	IgG1 kappa
Specificity:	The mouse monoclonal antibody GHI/61 recognizes an extracellular epitope CD163, an approximately 130 kDa high affinity scavenger receptor expressed mainly on monocytes and macrophages, which binds hemoglobin-haptoglobin complex.
Cross-Reactivity (Details):	Human
Purification:	Purified antibody is conjugated with R-phycoerythrin (PE) under optimum conditions. Unconjugated antibody and free fluorochrome are removed by size-exclusion chromatography.

Target Details

Target:	CD163	

Target Details

Target Details		
Alternative Name:	CD163 (CD163 Products)	
Background:	CD163 Molecule,CD163, also known as M130, is a member of the scavenger receptor family,	
	accounting for the clearance of hemoglobin-haptoglobin complexes during limited hemolysis,	
	which protects the body, in particular the kidneys, against heme-mediated oxidative damages. I	
	does not have measurable affinity for noncomplexed hemoglobin or haptoglobin.	
	Immunomodulatory role of CD163 has been postulated. CD163 is expressed by cells of the	
	monocyte-macrophage lineage and its extracellular part also circulates in plasma as a soluble	
	protein, especially during sepsis and other conditions affecting macrophage activity, when its	
	level may raise manyfold.,MM130, SCARI1	
Gene ID:	9332	
UniProt:	Q86VB7	
Application Details		
Application Notes:	Flow cytometry: The reagent is designed for analysis of human blood cells using 10 µL reagent	
	/ 100 μL of whole blood or 10 ⁶ cells in a suspension. The content of a vial (1 ml) is sufficient for	
	100 tests.	
Comment:	The purified antibody is conjugated with R-Phycoerythrin (PE) under optimum conditions. The	
	conjugate is purified by size-exclusion chromatography and adjusted for direct use. No	
	reconstitution is necessary.	
Restrictions:	For Research Use only	
Handling		
Reconstitution:	No reconstitution is necessary.	
Buffer:	Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide	
Preservative:	Sodium azide	
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which	
	should be handled by trained staff only.	
Handling Advice:	Do not freeze.	
	Avoid prolonged exposure to light.	
Storage:	4 °C	
Storage Comment:	Store at 2-8°C. Protect from prolonged exposure to light. Do not freeze.
