Target Details

Target:	Seladin 1 (DHCR24)
Alternative Name:	Seladin 1 (DHCR24 Products)
Background:	Synonyms: Seladin1, Seladin-1, DHCR24, 24 dehydrocholesterol reductase, 3-beta-hydroxysterol

Target Details

delta-24-reductase, DCE, Desmosterol to cholesterol enzyme, Diminuto dwarf1 homolog, SELADIN1, Selective AD indicator 1, Selective Alzheimer's Disease Indicator 1.

Background: Seladin 1 is highly expressed in brain, adrenal tissues and adrenal tumours, where this enzyme catalyzes the reduction of the delta-24 double bond of sterol intermediates such as desmosterol, during cholesterol biosynthesis. In addition, Seladin 1 has an anti-apoptotic function by reducing caspase 3 activity during oxidative stress-induced apoptosis and protecting cells against amyloid-beta peptide-induced apoptosis. Several studies have identified a reduction in expression levels of this enzyme in brain regions affected by Alzheimer's disease (hippocampus and the subventricular zone).
