

## Datasheet for ABIN802853 **anti-ACTRT2 antibody**

[Go to Product page](#)

### Overview

|              |                                       |
|--------------|---------------------------------------|
| Quantity:    | 100 µg                                |
| Target:      | ACTRT2                                |
| Reactivity:  | Human                                 |
| Host:        | Rabbit                                |
| Clonality:   | Polyclonal                            |
| Conjugate:   | This ACTRT2 antibody is un-conjugated |
| Application: | ELISA, Immunohistochemistry (IHC)     |

### Product Details

|               |                           |
|---------------|---------------------------|
| Purification: | Peptide affinity purified |
|---------------|---------------------------|

### Target Details

|                   |                                                                                                                                                                                                                                     |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:           | ACTRT2                                                                                                                                                                                                                              |
| Alternative Name: | ACTRT2 ( <a href="#">ACTRT2 Products</a> )                                                                                                                                                                                          |
| Background:       | Lyophilized rabbit anti- ACTRT2 purified by peptide affinity column containing 2% BSA and 0.02% NaN <sub>3</sub> . Rabbit polyclonal ACTRT2 (1) antibody was raised against a peptide near the C terminal residues of human ACTRT2. |
| NCBI Accession:   | <a href="#">NM_080431</a>                                                                                                                                                                                                           |

### Application Details

|                    |                                                                       |
|--------------------|-----------------------------------------------------------------------|
| Application Notes: | Peptide ELISA titer: 1:5,000-1:20,000. Immunohistochemistry: 1:50-200 |
|--------------------|-----------------------------------------------------------------------|

Application Details

Restrictions: For Research Use only

Handling

Format: Lyophilized

Reconstitution: Reconstitute in 200ul sterile H2 O.

Storage: -20 °C
