

## Datasheet for ABIN809475

## **Goat anti-Human IgE Antibody (DyLight 350)**

Oo to rioduct page

Overview	
Quantity:	0.2 mL
Target:	IgE
Reactivity:	Human
Host:	Goat
Clonality:	Polyclonal
Conjugate:	DyLight 350
Application:	Flow Cytometry (FACS), Immunomicroscopy (IM)
Product Details	
Immunogen:	IgE
Characteristics:	Goat anti-human IgE polyclonal antibody. Affinity purified. Cross-adsorbed against bovine, mouse or rabbit serum proteins. DyLight 350 (Ex 353 nm, Em 432 nm) conjugated
Purification:	Affinity purified using immobilized human IgE
Target Details	
Target:	IgE
Abstract:	IgE Products
Application Details	

## **Application Details**

minutes at room temperature prior to dilution. If necessary centrifuge  Concentration: 1 mg/mL  Buffer: 10 mM sodium phosphate, 0.15 M sodium chloride, pH 7.2, 1 % (w/v) BSA, protease/IgG free 0.01 % (w/v) sodium azide.  Preservative: Sodium azide  Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or inhaled. Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If skin eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact a physician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditions. Diluazide-containing compounds in running water before discarding to avoid accumulation of potentially explosive deposits in lead or copper plumbing.  Handling Advice: Product is photosensitive and should be protected from light.  Prepare working dilution prior to use and then discard. Be sure to mix well but without foaming the sure to mix well		
Format:  Lyophilized  Reconstitution:  Rehydrate with 1.1 mL of deionized water. Allow reconstituted product to stand for at least 3 minutes at room temperature prior to dilution. If necessary centrifuge  Concentration:  1 mg/mL  Buffer:  10 mM sodium phosphate, 0.15 M sodium chloride, pH 7.2, 1 % (w/v) BSA, protease/IgG free 0.01 % (w/v) sodium azide.  Preservative:  Sodium azide  Precaution of Use:  WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or inhaled. Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If skin eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact a physician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditions. Dilu azide-containing compounds in running water before discarding to avoid accumulation of potentially explosive deposits in lead or copper plumbing.  Handling Advice:  Product is photosensitive and should be protected from light.  Prepare working dilution prior to use and then discard. Be sure to mix well but without foamir A solution with 50 % glycerol will not freeze in -20 °C. If you are using a 1:5000 dilution prior to diluting with glycerol, then you would need to use a 1:2500 dilution after adding glycerol.	Comment:	DyLight® is a trademark of Thermo Fisher Scientific, Inc. and its subsidiaries.
Format:  Lyophilized  Reconstitution:  Rehydrate with 1.1 mL of deionized water. Allow reconstituted product to stand for at least 3 minutes at room temperature prior to dilution. If necessary centrifuge  Concentration:  1 mg/mL  Buffer:  10 mM sodium phosphate, 0.15 M sodium chloride, pH 7.2, 1 % (w/v) BSA, protease/IgG free 0.01 % (w/v) sodium azide.  Preservative:  Sodium azide  Precaution of Use:  WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or inhaled. Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If skin eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact a physician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditions. Dilu azide-containing compounds in running water before discarding to avoid accumulation of potentially explosive deposits in lead or copper plumbing.  Handling Advice:  Product is photosensitive and should be protected from light.  Prepare working dilution prior to use and then discard. Be sure to mix well but without foamir A solution with 50 % glycerol will not freeze in -20 °C. If you are using a 1:5000 dilution prior to diluting with glycerol, then you would need to use a 1:2500 dilution after adding glycerol.	Restrictions:	For Research Use only
Reconstitution: Rehydrate with 1.1 mL of deionized water. Allow reconstituted product to stand for at least 3 minutes at room temperature prior to dilution. If necessary centrifuge  Concentration: 1 mg/mL  Buffer: 10 mM sodium phosphate, 0.15 M sodium chloride, pH 7.2, 1 % (w/v) BSA, protease/lgG free 0.01 % (w/v) sodium azide.  Preservative: Sodium azide  Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or inhaled. Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If skin eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact a physician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditions.
