

## Datasheet for ABIN865850 **anti-GSTM1 antibody**

[Go to Product page](#)

### Overview

|              |                                      |
|--------------|--------------------------------------|
| Quantity:    | 100 µg                               |
| Target:      | GSTM1                                |
| Reactivity:  | Human                                |
| Host:        | Mouse                                |
| Conjugate:   | This GSTM1 antibody is un-conjugated |
| Application: | Western Blotting (WB), ELISA         |

### Product Details

|              |                                                                                                                                      |
|--------------|--------------------------------------------------------------------------------------------------------------------------------------|
| Immunogen:   | Purified mouse monoclonal antibody generated using E.coli expressed recombinant protein Glutathione S-transferase Mu 1 as immunogen. |
| Isotype:     | IgG1                                                                                                                                 |
| Specificity: | Anti-GSTM1 Alpha recognizes Glutathione S-transferase Mu 1 expression in Hela whole cell lysate.                                     |

### Target Details

|                   |                                                                                           |
|-------------------|-------------------------------------------------------------------------------------------|
| Target:           | GSTM1                                                                                     |
| Alternative Name: | GSTM1 ( <a href="#">GSTM1 Products</a> )                                                  |
| Background:       | Antigen: Recombinant protein corresponding to full length Glutathione S-transferase Mu 1. |
| UniProt:          | <a href="#">P10649</a>                                                                    |
| Pathways:         | <a href="#">Negative Regulation of Transporter Activity</a>                               |

## Application Details

---

Restrictions: For Research Use only

## Handling

---

|               |                                                                                                  |
|---------------|--------------------------------------------------------------------------------------------------|
| Format:       | Liquid                                                                                           |
| Buffer:       | Each vial contains 100 µg IgG in 100 µl of citrate-tris-HCl buffer pH7.0 with 0.02% Proclin 300. |
| Preservative: | ProClin                                                                                          |
| Storage:      | -20 °C                                                                                           |
