Target Details	
Background:	Synonyms: HBP, HDL binding protein, high density lipoprotein binding protein, high density
	lipoprotein binding protein vigilin, VGL, vigilin.
	Background: High density lipoprotein-binding protein, HDLBP, also known as vigilin, specifically
	binds HDL molecules and may function in the removal of excess cellular cholesterol. It may
	also be involved in the regulation of the delivery of fats to cells for energy and storage as fats in
	the bloodstream are not readily metabolized in the absence of HDLBP.
