## Target Details

Alternative Name:	JMJD6 ( <a href="#">JMJD6 Products</a> )
Background:	<p>Synonyms: Apoptotic cell clearance receptor, Bunctional arginine demethylase and lysyl-hydroxylase JMJD6, Histone arginine demethylase JMJD6, JmjC domain-containing protein 6, JMJD 6, JMJD6, JMJD6_HUMAN, Jumonji domain containing 6, Jumonji domain-containing protein 6, KIAA0585, Lysyl-hydroxylase JMJD6, Peptide-lysine 5-dioxygenase JMJD6, Phosphatidylserine receptor, Protein PTDSR, PTDSR 1, PTDSR, PTDSR1.</p> <p>Background: This gene encodes a nuclear protein with a JmjC domain. JmjC domain-containing proteins are predicted to function as protein hydroxylases or histone demethylases. This protein was first identified as a putative phosphatidylserine receptor involved in phagocytosis of apoptotic cells, however, subsequent studies have indicated that it does not directly function in the clearance of apoptotic cells, and questioned whether it is a true phosphatidylserine receptor. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jul 2008].</p>
