

Datasheet for ABIN878194

**anti-PKC zeta antibody (pThr410) (AbBy Fluor® 350)**[Go to Product page](#)

## Overview

|                      |                                                                                                                                |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------|
| Quantity:            | 100 µL                                                                                                                         |
| Target:              | PKC zeta (PRKCZ)                                                                                                               |
| Binding Specificity: | pThr410                                                                                                                        |
| Reactivity:          | Human                                                                                                                          |
| Host:                | Rabbit                                                                                                                         |
| Clonality:           | Polyclonal                                                                                                                     |
| Conjugate:           | This PKC zeta antibody is conjugated to AbBy Fluor® 350                                                                        |
| Application:         | Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)) |

## Product Details

|                       |                                                                                                            |
|-----------------------|------------------------------------------------------------------------------------------------------------|
| Immunogen:            | KLH conjugated synthetic phosphopeptide derived from human PRKCZ around the phosphorylation site of Thr410 |
| Isotype:              | IgG                                                                                                        |
| Predicted Reactivity: | Human, Mouse, Rat, Dog, Cow, Pig, Horse, Rabbit                                                            |
| Purification:         | Purified by Protein A.                                                                                     |

## Target Details

|                   |                                          |
|-------------------|------------------------------------------|
| Target:           | PKC zeta (PRKCZ)                         |
| Alternative Name: | PRKCZ ( <a href="#">PRKCZ Products</a> ) |

## Target Details

|             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| Background: | <p>Synonyms: PRKCZphospho T410, PRKCZphospho Thr410, p-PRKCZT410, rotein Kinase C, AAG6, Aging associated gene 6, MGC129900, MGC129901, MGC41878, MGC57564, PKC B, PKC beta, PKC zeta, PKC2, PKCB, PKCC, PKCD, PKCE, PKCG, PRKACA, PRKC A, PRKC G, PRKCA, PRKCB, PRKCB1, PRKCB2, PRKCD, PRKCE, PRKCG, PRKCZ , Protein kinase C alpha, Protein kinase C alpha type, Protein Kinase C, Protein kinase C beta 1, Protein kinase C beta 1 polypeptide, Protein kinase C beta, Protein kinase C beta type, Protein kinase C delta, Protein kinase C epsilon, Protein kinase C gamma, Protein kinase C gamma type, Protein kinase C zeta, SCA14, Spinocerebellar ataxia 14.</p> <p>Background: Protein kinase C (PKC) zeta is a member of the PKC family of serine/threonine kinases which are involved in a variety of cellular processes such as proliferation, differentiation and secretion. Unlike the classical PKC isoenzymes which are calcium-dependent, PKC zeta exhibits a kinase activity which is independent of calcium and diacylglycerol but not of phosphatidylserine. Furthermore, it is insensitive to typical PKC inhibitors and cannot be activated by phorbol ester. Unlike the classical PKC isoenzymes, it has only a single zinc finger module. These structural and biochemical properties indicate that the zeta subspecies is related to, but distinct from other isoenzymes of PKC. Alternative splicing results in multiple transcript variants encoding different isoforms. [provided by RefSeq, Jul 2008].</p> |
| Gene ID:    | 5590                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| Concentration:     | 1 µg/µL                                                                                      |
| Buffer:            | Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and |

## Handling

---

50 % Glycerol.

Preservative: ProClin

Precaution of Use: This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.

Storage: -20 °C

Storage Comment: Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.

Expiry Date: 12 months
