Background:	Synonyms: BEXL1, NADE3, BEX1 like 1, brain expressed gene 4, Brain expressed X linked
	protein 4 homolog, Nerve growth factor receptor associated protein 3, Protein BEX4, TCEAL7,
	transcription elongation factor A SII like 7, BEX4_HUMAN.
	Background: This gene is a member of the brain expressed X-linked gene family. The proteins
	encoded by some of the other members of this family act as transcription elongation factors
	which allow RNA polymerase II to escape pausing during elongation. Multiple alternatively
	spliced variants, encoding the same protein, have been identified. [provided by RefSeq, Aug
