Target Details

Background:	Synonyms: Abundant in neuroepithelium area protein, ANA, BTG family member 3, Btg3, BTG3_HUMAN, Protein BTG3, Protein Tob5, Protein BTG3. Background: The protein encoded by this gene is a member of the BTG/Tob family. This family has structurally related proteins that appear to have antiproliferative properties. This encoded protein might play a role in neurogenesis in the central nervous system. Two transcript variants encoding different isoforms have been found for this gene.
