	protein, Carbonic anhydrase VIII, Carbonic anhydrase-related protein, CARP, MGC120502,
	MGC99509. Background: The protein encoded by this gene was initially named CA-related protein because of sequence similarity to other known carbonic anhydrase genes. However, the gene product lacks carbonic anhydrase activity (i.e., the reversible hydration of carbon dioxide). The gene
	product continues to carry a carbonic anhydrase designation based on clear sequence identity to other members of the carbonic anhydrase gene family. The absence of CA8 gene
	transcription in the cerebellum of the lurcher mutant in mice with a neurologic defect suggests
	an important role for this acatalytic form.
Gene ID:	767
