## Target Details

---

CARD6, CARD6\_HUMAN, Caspase recruitment domain family, member 6, Caspase recruitment domain protein 6, Caspase recruitment domain-containing protein 6, CINCIN1, D730008L15.

Background: This gene encodes a protein that contains a caspase recruitment domain (CARD), an antiparallel six-helical bundle that mediates homotypic protein-protein interactions. The encoded protein is a microtubule-associated protein that has been shown to interact with receptor-interacting protein kinases and positively modulate signal transduction pathways converging on activation of the inducible transcription factor NF- $\kappa$ B.
