Background:	Synonyms: Centromere protein H, CENP-H, Interphase centromere complex protein 35, CENPH,
	ICEN35
	Background: Component of the CENPA-NAC (nucleosome-associated) complex, a complex that
	plays a central role in assembly of kinetochore proteins, mitotic progression and chromosome
	segregation. The CENPA-NAC complex recruits the CENPA-CAD (nucleosome distal) complex
	and may be involved in incorporation of newly synthesized CENPA into centromeres. Required
	for chromosome congression and efficiently align the chromosomes on a metaphase plate.
