| Background:         | <ul> <li>Synonyms: C16orf56, CENP T, CENP-T, Cenpt, CENPT_HUMAN, Centromere protein T,</li> <li>Chromosome 16 open reading frame 56, ICEN22, Interphase centromere complex protein 22.</li> <li>Background: Component of the CENPA-NAC (nucleosome-associated) complex, a complex that</li> <li>plays a central role in assembly of kinetochore proteins, mitotic progression and chromosome</li> <li>segregation. The CENPA-NAC complex recruits the CENPA-CAD (nucleosome distal) complex</li> <li>and may be involved in incorporation of newly synthesized CENPA into centromeres. CENP-T is</li> <li>one of the basic inner kinetochore proteins with most further proteins binding downstream,</li> <li>suggesting a fundamental role of CENP-T in kinetochore function.</li> </ul> |
