Datasheet for ABIN890706 anti-CIDEC antibody (AA 101-200) (Alexa Fluor 488)

Overview

Quantity:	100 µL
Target:	CIDEC
Binding Specificity:	AA 101-200
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This CIDEC antibody is conjugated to Alexa Fluor 488
Application:	Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p))

Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human CIDEC
Isotype:	lgG
Specificity:	Due to the similarity of this protein with CIDEA in Mouse and Rat, there is a chance that this antibody will react with this protein in those two species based on homology.
Cross-Reactivity:	Human, Mouse, Rat
Predicted Reactivity:	Pig
Purification:	Purified by Protein A.

Target:	CIDEC
Alternative Name:	CIDEC (CIDEC Products)
Background:	Synonyms: CIDE3, FPLD5, FSP27, CIDE-3, Cell death activator CIDE-3, Cell death-inducing DFFA
	like effector protein C, Fat-specific protein FSP27 homolog, CIDEC
	Background: Binds to lipid droplets and regulates their enlargement, thereby restricting lipolysis
	and favoring storage. At focal contact sites between lipid droplets, promotes directional net
	neutral lipid transfer from the smaller to larger lipid droplets. The transfer direction may be
	driven by the internal pressure difference between the contacting lipid droplet pair. Its role in
	neutral lipid transfer and lipid droplet enlargement is activated by the interaction with PLIN1.
	May act as a CEBPB coactivator in the white adipose tissue to control the expression of a
	subset of CEBPB downstream target genes, including SOCS1, SOCS3, TGFB1, TGFBR1, ID2 and
	XDH. When overexpressed in preadipocytes, induces apoptosis or increases cell susceptibility
	to apoptosis induced by serum deprivation or TGFB treatment. As mature adipocytes, that
	express high CIDEC levels, are quite resistant to apoptotic stimuli, the physiological significance
	of its role in apoptosis is unclear. May play a role in the modulation of the response to osmotic
	stress by preventing NFAT5 to translocate into the nucleus and activate its target genes
	expression.
Gene ID:	63924

Gene ID:	63924
UniProt:	Q96AQ7

Application Details

Application Notes:	IF(IHC-P) 1:50-200
	IF(IHC-F) 1:50-200
	IF(ICC) 1:50-200
Restrictions:	For Research Use only

Handling

Format:	Liquid
Concentration:	1 μg/μL
Buffer:	Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin

Handling	
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	-20 °C
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
Expiry Date:	12 months
