Target Details

oxidoreductase homolog 1, Quinone oxidoreductase like 1, Quinone oxidoreductase-like protein 1, Quinone reductase like 1, Zeta crystallin homolog, Zeta-crystallin homolog.

Background: This gene encodes a protein that has sequence similarity to zeta crystallin, also known as quinone oxidoreductase. This zeta crystallin-like protein also contains an NAD(P)H binding site. Alternatively spliced transcript variants have been observed but their full-length nature has not been completely determined.
