antibodies

Datasheet for ABIN900084 anti-Influenza A Matrix Protein 2 antibody (Influenza A Virus) (AA 2-60) (Alexa Fluor 350)

Overview

Quantity:	100 μL	
Target:	Influenza A Matrix Protein 2 (M2)	
Binding Specificity:	AA 2-60	
Reactivity:	Influenza A Virus, Virus	
Host:	Rabbit	
Clonality:	Polyclonal	
Conjugate:	Alexa Fluor 350	
Application:	Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p))	

Product Details

Immunogen:	KLH conjugated synthetic peptide derived from Influenza A virus H5N1 Matrix Protein-2	
lsotype:	lgG	
Specificity:	This antibody will recognize many Influenza A virus strains	
Cross-Reactivity:	Virus	
Cross-Reactivity (Details):	Influenza A virus	
Purification:	Purified by Protein A.	
Target Details		
Target:	Influenza A Matrix Protein 2 (M2)

lucerze A virue Metrix Protein 2 (M2 Producto)
luenza A virus Matrix Protein 2 (M2 Products)
luenza Protein
nonyms: Avian influenza Matrix Protein-2, Influenza A virus H7N7 H9N2 H13N6 H16N3 H1N1 2N1 H3N2 H2N2 ckground: Forms a proton-selective ion channel that is necessary for the efficient release of a viral genome during virus entry. After attaching to the cell surface, the virion enters the cell endocytosis. Acidification of the endosome triggers M2 ion channel activity. The influx of botons into virion interior is believed to disrupt interactions between the viral ribonucleoprotein NP), matrix protein 1 (M1), and lipid bilayers, thereby freeing the viral genome from eraction with viral proteins and enabling RNA segments to migrate to the host cell nucleus, here influenza virus RNA transcription and replication occur. Also plays a role in viral proteins cretory pathway. Elevates the intravesicular pH of normally acidic compartments, such as ins-Golgi network, preventing newly formed hemagglutinin from premature switching to the sion-active conformation

Application Details

Application Notes:	IF(IHC-P) 1:50-200
	IF(IHC-F) 1:50-200
	IF(ICC) 1:50-200
Restrictions:	For Research Use only

Handling

Format:	Liquid
Concentration:	1 µg/µL
Buffer:	Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	-20 °C
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
