Alternative Name:	MCC (MCC Products)
Background:	Synonyms: Colorectal mutant cancer protein, MCC 1, MCC-1, MCC1, Mutated in colorectal

Background: This gene is a candidate colorectal tumor suppressor gene that is thought to negatively regulate cell cycle progression. The orthologous gene in the mouse expresses a phosphoprotein associated with the plasma membrane and membrane organelles, and overexpression of the mouse protein inhibits entry into S phase. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jul 2008].
