Target Details

Background: Synonyms: LRR and PYD domains-containing protein 9, NACHT, NACHT, LRR and PYD domains-containing protein 9, NALP9_HUMAN, NLRP9, Nucleotide-binding oligomerization domain protein 6, PYRIN and NACHT-containing protein 12.

Background: The protein encoded by this gene belongs to the NALP protein family. Members of the NALP protein family typically contain a NACHT domain, a NACHT-associated domain (NAD), a C-terminal leucine-rich repeat (LRR) region, and an N-terminal pyrin domain (PYD). This protein may play a regulatory role in the innate immune system as similar family members belong to the signal-induced multiprotein complex, the inflammasome, that activates the pro-inflammatory caspases, caspase-1 and caspase-5.
