Datasheet for ABIN911004 anti-PHKB antibody (AA 45-160) (Alexa Fluor 488)

Overview

Quantity:	100 µL
Target:	РНКВ
Binding Specificity:	AA 45-160
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This PHKB antibody is conjugated to Alexa Fluor 488
Application:	Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p))

Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human PHKB
lsotype:	lgG
Cross-Reactivity:	Human
Predicted Reactivity:	Mouse,Rat,Dog,Cow,Pig,Horse,Rabbit
Purification:	Purified by Protein A.
Target Details	
Target:	РНКВ

Alternative Name:	PHKB (PHKB Products)

Target Details	
Background:	Synonyms: Phosphorylase B, Phosphorylase kinase B, Phosphorylase kinase beta polypeptide,
	Phosphorylase kinase beta subunit, DKFZp781E15103, FLJ41698, KPBB_HUMAN.
	Background: Phosphorylase kinase is a polymer of 16 subunits, four each of alpha, beta,
	gamma and delta. The alpha subunit includes the skeletal muscle and hepatic isoforms,
	encoded by two different genes. The beta subunit is the same in both the muscle and hepatic
	isoforms, encoded by this gene, which is a member of the phosphorylase b kinase regulatory
	subunit family. The gamma subunit also includes the skeletal muscle and hepatic isoforms,
	encoded by two different genes. The delta subunit is a calmodulin and can be encoded by three
	different genes. The gamma subunits contain the active site of the enzyme, whereas the alpha
	and beta subunits have regulatory functions controlled by phosphorylation. The delta subunit
	mediates the dependence of the enzyme on calcium concentration. Mutations in this gene
	cause glycogen storage disease type 9B, also known as phosphorylase kinase deficiency of
	liver and muscle. Alternatively spliced transcript variants encoding different isoforms have been
	identified in this gene. Two pseudogenes have been found on chromosomes 14 and 20,
	respectively.[provided by RefSeq, Feb 2010].
Gene ID:	5257
Pathways:	Cellular Glucan Metabolic Process
Application Details	
Application Notes:	IF(IHC-P) 1:50-200
	IF(IHC-F) 1:50-200
	IF(ICC) 1:50-200
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	1 μg/μL
Buffer:	Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and
	50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be
	handled by trained staff only.

Handling	
Storage:	-20 °C
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
Expiry Date:	12 months
