Porimin (TMEM123 Products)

Target Details	
Background:	Synonyms: KCT3, Keratinocytes associated transmembrane protein 3, Pro oncosis receptor
	inducing membrane injury, Serine/threonine rich receptor, TMEM123, Transmembrane protein 123, PORIM_HUMAN.
	Background: This gene encodes a highly glycosylated transmembrane protein with a high
	content of threonine and serine residues in its extracellular domain, similar to a broadly defined
	category of proteins termed mucins. Exposure of some cell types to anti PORIMIN (pro oncosis
	receptor inducing membrane injury) antibody, crosslinks this protein on the cell surface and
	induces a type of cell death termed oncosis. Oncosis is distinct from apoptosis and is
	characterized by a loss of cell membrane integrity without DNA fragmentation. This gene
	product is proposed to function as a cell surface receptor that mediates cell death.
Gene ID:	114908
